PROFILE

I graduated from Bournemouth University in 2013 and began my career in a rotational post at the Royal Wolverhampton Trust, gaining experience in the core areas of Physiotherapy. I then continued my NHS career at the Worcestershire Acute Trust and progressed to a Band 6 Physiotherapist. I have experienced working on the intensive care unit, medical, surgical wards and am respiratory competent to deal with on call situations. I have worked in musculoskeletal outpatients, elderly/frailty wards and am confident working with people who have Dementia, Parkinson's disease and those with long term medical/neurological conditions.

I confirmed my passion for working within neurological rehabilitation when I worked on an Acute stroke unit and neuro rotation. I enjoy the variability of patient presentation and the challenge of adapting to each individual differently to provide a good quality assessment and treatments.

The experience I have gained working in the NHS and completing my core rotations in Physiotherapy has provided the fundamentals to complete excellent assessment and treatment skills for a wide range of patients. I am hardworking, dedicated and motivated to provide high quality therapy and help people to achieve their goals.
